Test Summary Report

Purpose

This document presents the results of the tests carried out on the website- **"MY JEANS"**.

which has an online store and a physical store in Israel.

The company's website was checked.

The tests were performed on the main functions of the site, which include actions such as- displaying the menu, graphic design, proper functioning of placing an order, registering on the website, reading the information, and using various features.

Application Overview

"My Jeans" is an online platform that offers a seamless shopping experience for clothing, particularly jeans. Accessible via desktops, laptops, tablets, or smartphones, the website provides convenience from anywhere and at any time.

Designed to be user-friendly, the website boasts an intuitive interface, making it easy for users to browse and find the desired products. By offering filters for categories, cuts, and other specifications, users can quickly refine their search.

Detailed information, including photos and specifications, accompanies each product, helping customers make informed decisions. To enhance the shopping experience further, the site incorporates helpful features such as a wish list for saving desired items and a size guide for ensuring the perfect fit.

Furthermore, "My Jeans" website provides a range of payment and delivery options, including home delivery and in-store pickup, allowing customers to choose what works best for them. Additionally, a dedicated customer service section is available, offering answers to common inquiries and assisting with support-related matters.

In summary, "My Jeans" offers a convenient and efficient platform for purchasing clothing and accessories, showcasing a diverse product range, user-friendly tools, and flexible payment and delivery choices.

Recommendations

1. Uniformity language for the entire site, make Hebrew the default language.
2. Change the **"My Account"** page to a dynamic page that responds according to logged-in users and not logged-in users, dynamic buttons, forms, and a menu.
3. Improve **the accessibility menu** so that all its functions work as they should.
4. Add an option to change the language of the website, at least for English \ Arabian \ and Russian.
5. Optimize Page Load Speed: Optimize the website's code and image sizes to improve page load speed. Slow loading times can result in higher bounce rates and lower user engagement.
6. Add a **Loading Icon** to let the user know that their action has been accepted.

Conclusion

Following tests on the "MY JEANS" website, several bugs were identified with different levels of Severity, spanning from low to critical issues.

In summary, it can be concluded that the "MY JEANS" website has a strong foundation, featuring an intuitive interface and successfully executing the majority of its core functions.

Nevertheless, it is important to address the identified bugs as their resolution would enhance user satisfaction and potentially boost sales.

Despite this, my recommendation is to proceed with the website's release.

Steps To Reproduce:

1. Press on the Hamburger menu
2. Click on "SHOP ALL JEANS"
3. Click on the Heart icon at the top left of "my Super Black" product
4. There is a pop up window with 2 options: "צפה ברשימת המשאלות" and "Close X"
5. Do not press on any of them, wait a few seconds
The page automatically leads you to the "המשאלות שלי" page

Actual Result:

The page is waiting a few seconds and then leads the user to the "המשאלות שלי" page

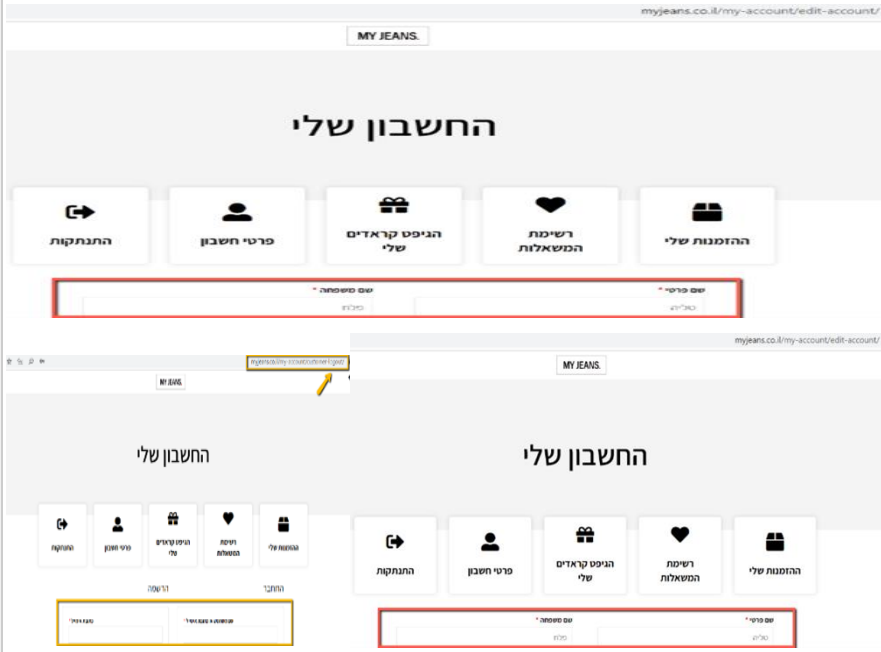

Expected Result:

The page will wait to the user reaction instead of leads him to other page without any request from his side
